

How healthy are you ?

I - Eating habits and hygiene :

How often do you think you eat too fat, too salted or drink too sweet ?

II – Physical activities and rest :

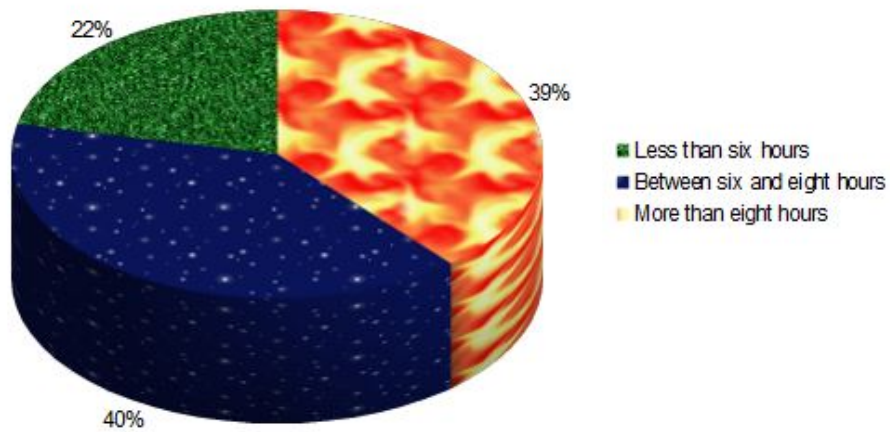

Do you practise any physical activity or sports ?

If yes, how many hours per week ?

How many do you sleep per night ?

How long does it take you to fall asleep ?

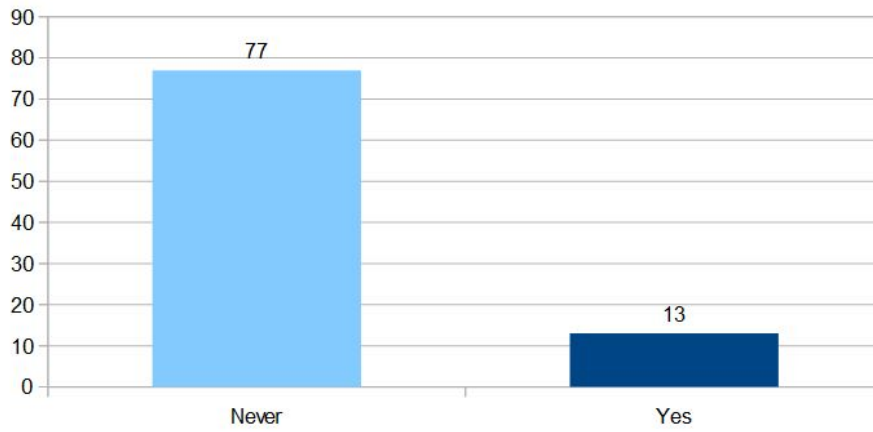

III – Potential « risks » and exposure to nuisances :

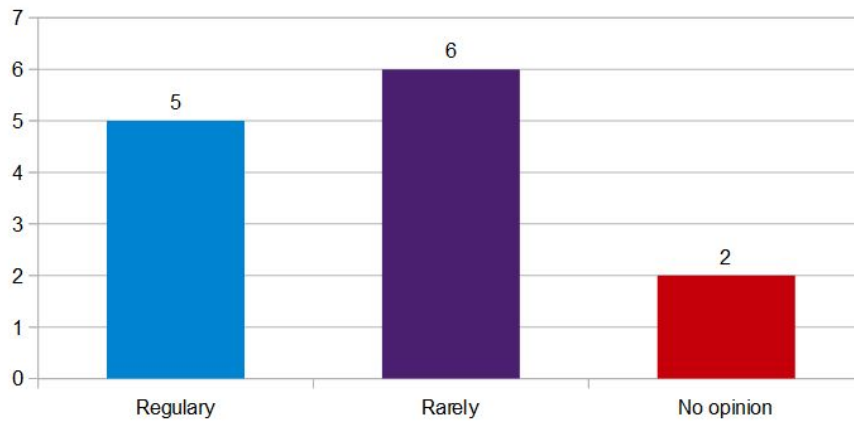

Are you next to your parents when they smoke ?

Have you ever smoked ?

If yes ?

Have you even taken drugs ?
